<https://github.com/bjnandi> <https://www.linkedin.com/in/bjnandi>

Passionate about learning, growing, and adapting to new challenges outside my expertise. With dedication and hard work, I look forward to exploring opportunities to impact and contribute to the team's success.

WORK EXPERIENCE

DevOps Engineer [Riseup Lab, Dhaka]

01/2026 - Present

- Designed, implemented, and maintained Jenkins CI/CD pipelines to accelerate software delivery.
- Deployed and managed applications using Docker, Docker Swarm, traditional deployment and Kubernetes to ensure scalable and reliable operations across multiple projects and various technology stacks.
- Supported critical systems handling millions of users by maintaining high availability, performance, and efficient infrastructure management.
- Managed AWS and Azure cloud infrastructure optimizing cost and performance also on-premises server.
- Configured and maintained Linux servers with proactive monitoring using Grafana and Prometheus, ensuring high availability, security, backups, disaster recovery strategie & automation using shell scripts.
- Configured DNS, SSL certificates, and WAF integration, optimizing website security and performance.
- Collaborated development teams to optimize deployment workflows & troubleshoot production issues.

System Engineer (DevOps) [Sheba Platform Limited, Dhaka]

06/2025 - 01/2026

- Deployed and maintained containerized & legacy applications across AWS Cloud & on-premises servers.
- Responsible for ensuring all services run smoothly 24/7, promptly resolving issues and performing root cause analysis to prevent future incidents, especially for mission-critical, high-traffic services.
- Support the developer with any server-side issues and ensure all services are running properly.
- Migration of the 120+ microservices in a dependent business unit from one AWS account to a new AWS account and on-premises servers, and ensure security as a fintech organization.
- Implemented AWS solutions with auto-scaling, load balancing, and automated backups, achieving 99% uptime for better scalability, reliability & performance.
- Set up & maintained monitoring, logging & alerting systems using Zabbix, Grafana, Prometheus, and Loki.
- Optimized operational costs by 20% while maintaining performance monitoring & system reliability.

Web Developer & DevOps Support [UFO STUDIO, Khulna]

03/2020 - 07/2023

- Hosted and maintained web applications across AWS Cloud platforms & traditional hosting providers.
- Configured domain, SSL certificates & integrated CDN to improve website speed & security.
- Optimized website performance, improving load times by 35%, leading to better SEO & user experience.

DevOps IT Bootcamp Participator [App Incubator, Dhaka]

08/2022 - 11/2022

- Containerized applications using Docker and deployed them on Kubernetes microservices architecture.
- Implemented CI/CD pipelines using AWS CodePipeline & Jenkins, including job schedule management.

Associate Web Developer [UFO STUDIO, Khulna]

06/2016 - 02/2020

- Customized & designed 150+ WordPress websites, delivering visually appealing & responsive layouts.
- Implemented advanced client-specific features, including theme customization, plugin configuration & WooCommerce setup according to business needs for high-performance WordPress website setups.

SKILLS

AWS Docker Kubernetes CI/CD Ansible Terraform Monitoring Linux Nginx Node.js PHP

CERTIFICATIONS

- Certified 'AWS Certified DevOps Engineer - Professional (DOP-C02)' from [AWS Certification](#) [2025]
- Certified 'AWS Certified Solutions Architect - Associate (SAA-C03)' from [AWS Certification](#) [2024]
- Certified 'DevOps Career Track: Season 1' from [Poridhi.io](#) [2024]

COMMUNITY VOLUNTEER

- ★ **AWS Community Builder [2023, 2025]:** Contributing to AWS discussions, sharing knowledge, and engaging with the cloud community through blogs, webinars, and networking.

HANDS-ON EXPERIENCE

- **Deploying a Fully Serverless Web App on AWS with Lambda, DynamoDB, API Gateway & S3.**
Technology: Lambda, DynamoDB, API Gateway, S3, Terraform, AWS. [More details](#)
- **Monitoring & Alerting using Grafana, Loki & Prometheus for Kubernetes, Nginx Metrics & Logs.**
Technology: Kubernetes, Nginx, Grafana, Loki, Prometheus. [More details](#)
- **CI/CD pipeline for a MERN app in Kubernetes with Terraform using GitHub Actions & Ansible.**
Technology: Kubernetes, Terraform, Ansible, GitHub Actions, Docker, MERN, EC2, AWS. [More details](#)
- **Containerize a full-stack web application (MERN) with Docker Compose.**
Technology: Docker, Docker Compose, MERN. [More details](#)
- **Deploy a high-availability, scalable WordPress website securely in the AWS Cloud.**
Technology: Load Balancer, RDS, CloudFront, Route 53, CloudWatch, EC2, AWS. [More details](#)
- **Schedule a reboot, start, or stop an EC2 instance to run automatically at midnight.**
Technology: Lambda, EventBridge, SNS, EC2, AWS. [More details](#)

If you want to see more of my projects, check out [GitHub](#) or my [Medium](#) account.

EDUCATION

- ❖ BSc in Computer Science & Engineering, North Western University, Khulna [2020]
- ❖ Diploma in Computer Technology, Khulna Polytechnic Institute, Khulna [2016]
